

LIFE FROM INSIDE

## ENERGY POLICY

The continuous improvement of the **Energy Management System** according to UNI CEI EN ISO 50001:2018 standard in force at Bracco Imaging S.p.A. and its subsidiary Spin S.p.A. is an important piece of the Bracco's sustainability project.

In this document the Management of Bracco Imaging S.p.A. **declares the following commitments** through the Energy Management System's tools:

- to define an **Energy Policy** depending on the nature of the use and the extent of energy consumption;
- to minimize the direct and indirect greenhouse gas emissions related to the energy used in its plants, until reaching **Carbon Neutrality**,
- to ensure the **continuous improvement of energy performance** of its plants;
- to comply with applicable legal requirements and other requirements, encouraging adherence to voluntary initiatives aimed at further improving use, consumption and energy efficiency;
- to define and periodically review energy objectives and targets;
- to **make available the information and resources** necessary to achieve the objectives and goals;
- to sustain the **procurement of energy efficient products and services**;
- **to support the self-power generation from renewable sources**;
- to sustain the procurement of energy vectors generated from renewable sources;
- to promote the design of equipment and production processes considering their energy performance improvement;
- to support the achievement of the energy aspects as defined by the UN 2030 Agenda for Sustainable Development;
- to ensure **training for employees** involved in the process of continuous improvement of energy performance;
- **to inform all employees about energy performance** and the results obtained;
- to ensure that **all employees can actively contribute** to the energy management system;
- when necessary, periodically **review and update the corporate commitments** contained in this Policy.

LIFE FROM INSIDE

The Management undertakes **to encourage** all members of the organization **to know and implement** this Policy, in order to open a dialogue between the company, employees, customers, suppliers and institutional subjects that leads to a greater sensitivity towards the issues of **efficiency, reduction of energy costs, reduction of greenhouse gas emissions** and other related environmental impacts.

The Management also guarantees that this Policy is available for the internal and external stakeholders by exploiting all the communication tools in its possession, such as company notice boards, intranet and website <https://www.bracco.com/it/il-gruppo/politica-hse>
