

# Carbon Reduction Plan

## Bracco UK Ltd

Bracco UK Ltd is committed to achieving net zero emissions by 2045.

## Baseline Emissions Footprint vs Current Emissions Footprint

Baseline emissions are a record of the greenhouse gasses that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

## Carbon Reduction: Projected vs Actual

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We project that carbon emissions will decrease over the next years to 15.8589 by 2045 this is a reduction of 90%

## Information About our Organisation

Emissions have increased as our business operations have grown. We are committed to managing this growth responsibly and limiting any unnecessary increases wherever possible.

## Additional Details About our Emissions and Targets

Year	Comments
2025	Emissions have increased as our business operations have grown. We are committed to managing this growth responsibly and limiting any unnecessary increases wherever possible. We have been able to collect more comprehensive waste data from our distribution site for this year. All waste generated at the site is recycled, resulting in a 100% recycling rate.
2024	Emissions have increased as a result of expanded business operations and improved data accuracy from suppliers. However, we are actively working to manage this growth responsibly and minimise any unnecessary increases. Scope 1 - There are no emissions associated with Scope 1 Scope 3 Category 5 Waste Generated in Operations - There are no emissions associated with Scope 3 Category 5
2023	Scope 1 - There are no emissions associated with Scope 1 Scope 2 - There are no emissions associated with Scope 2 Scope 3 Category 5 Waste Generated in Operations - There are no emissions associated with Scope 3 Category 5

## Carbon Reduction Projects

The following environmental management measures and projects are currently in progress or have been completed since the 2023 baseline.

### Actions In Progress

---

#### Business Mileage (private vehicle)

**Target Completion Date:** 31/12/2026

**Objective**

To minimise environmental impact through reduced business travel while maintaining operational effectiveness.

**Target**

Achieve measurable reduction in business travel emissions relative to employee headcount through enhanced journey efficiency and sustainable transport adoption.

**Action, Improvement or Control**

Develop smart travel solutions through route optimisation, geographical meeting consolidation, virtual meeting adoption where appropriate. Also encourage staff to purchase and or transition to hybrid/electric vehicles.

---

#### Transportation - Receiving and delivery of goods

**Target Completion Date:** 31/12/2026

**Objective**

Use the lowest impact transport method available. Engage with logistics providers to share your emissions reduction goals and explore how they can support your journey towards lower-carbon transport.

**Target**

Reduce emissions from upstream and downstream transportation and distribution.

**Action, Improvement or Control**

Have conversations with suppliers to advise that we are looking to reduce emissions from transport, as such they should prioritise transporting our products using the lowest emission vehicles available to them.

---

## Improve waste data collection and recycling practices with distribution centres

**Completion Date:** 01/03/2026  
**Estimated Carbon Reduction:** 0.0000

**Objective**

To obtain accurate waste data from distribution centres and ensure that waste is managed responsibly. To increase the proportion of waste that is recycled or reused rather than sent to landfill.

**Target**

**Action, Improvement or Control**

Engage with distribution centre partners to request detailed waste data and reporting processes. Work collaboratively with them to implement practices that prioritise recycling and reuse of materials.

**Impact:**

Distribution centre has 100% recycling rate.

## Serviced Office Data

**Completion Date:** 16/05/2025  
**Estimated Carbon Reduction:** 0.0000

**Objective**

To gain a comprehensive understanding of the carbon emissions and environmental impact associated with the serviced office operations.

**Target**

**Action, Improvement or Control**

Conduct a thorough audit of energy usage, waste management, and building operations through collaboration with the serviced office provider.

**Impact:**

This has increased the accuracy of the reported data.

## Data Collection

**Completion Date:** 10/05/2025  
**Estimated Carbon Reduction:** 0.0000

**Objective**

To improve the quality and reliability of organisational data collection processes.

**Target**

**Action, Improvement or Control**

Implement standardised data collection procedures and strengthen monitoring systems.

**Impact:**

We now have a much more accurate set of data for this years calculation
