

INDUSTRY SYMPOSIUM

You are invited!

ECR 2026

Vienna, Austria

Thursday, March 5th, 2026

14:30 – 15:30

Room G2 (Level -2)

Advancing CEUS in Radiology: Clinical Innovations, Faster Pathways, Higher efficiency

Moderator: Prof. Adrian Lim

Faculty

Prof. Adrian Lim
(London, UK)

Prof. Thom Fischer
(Berlin, Germany)

Prof. Maija Radzina
(Riga, Latvia)

UNLOCKING THE
INVISIBLE

General description

This symposium moderated by Prof. Adrian Lim (UK), explores how Contrast-Enhanced Ultrasound (CEUS) impacts on modern radiology departments across Europe by delivering cutting-edge clinical performance, accelerating diagnostic pathways, and improving patient outcomes and efficiency in the healthcare system. Prof. Fischer (Germany) and Prof. Maija Radzina (Latvia) bring their expertise presenting the latest clinical updates, and practical strategies for integrating CEUS into routine workflows. Attendees will gain insights into how CEUS enables high level fast diagnosis, streamlines decision-making, and can support efficiency improvements in radiological imaging services.

**This symposium is co-organized with
Canon Medical Systems Europe**

This program will also be available
24 hrs after live streaming on
