Contrast Management without Fear: Myths vs. Reality

Speakers:

Domenico Albano, Milan, Italy

Maddalena Gambacorti Passerini, Milan, Italy

General description

This interactive session offers a concise and practical overview of iodinated contrast media use in CT imaging in elderly patients, children, and pregnant or breastfeeding women. The event will include a clinical case presentation and discussion on the appropriate use of iodinated contrast agents in these patients, in accordance with the approved European product summaries and guidelines from scientific societies. The aim is to equip radiologists with the knowledge and confidence needed to safely and appropriately administer iodinated contrast agents to these patient populations.
